

Arms of
Baden-
Hochberg

```
graph TD; A((Arms of Baden-Hochberg)) --> B((Does the top quadrant without the lion have a dip?)); B -- YES --> C((A'.a.b or A'.b)); B -- NO --> D((A'.a.a));
```

This flowchart illustrates the classification of the Arms of Baden-Hochberg. It begins with a black circle at the top labeled 'Arms of Baden-Hochberg'. An orange arrow points down to a light orange circle containing the question 'Does the top quadrant without the lion have a dip?'. From this central question, two orange arrows branch out. The left arrow, labeled 'YES', points to a light orange circle containing 'A'.a.b or A'.b'. The right arrow, labeled 'NO', points to a light orange circle containing 'A'.a.a'.

Does the top
quadrant
without the lion
have a dip?

YES

NO

A'.a.b
or
A'.b

A'.a.a
