

Countermark D

```
graph TD; A((Countermark D)) --> B((Is there a letter 'G' next to the 'D'?)); B -- YES --> C((DG'.a.)); B -- NO --> D((DS.a.));
```

This flowchart starts with a black circle labeled 'Countermark D'. A thick orange line connects it to a central orange circle containing the question 'Is there a letter 'G' next to the 'D'?'. From this central circle, two orange lines branch out: one to the left labeled 'YES' leading to an orange circle 'DG'.a.', and one to the right labeled 'NO' leading to an orange circle 'DS.a.'.

Is there a letter
'G' next to the
'D'?

YES

NO

DG'.a.

DS.a.
