

Countermark D

```
graph TD; A((Countermark D)) --> B((Is there a letter 'G' next to the 'D'?)); B -- YES --> C((DG'.a.)); B -- NO --> D((DS.a.));
```

This flowchart starts with a black circle labeled 'Countermark D'. A thick yellow line connects it to a central yellow circle containing the question 'Is there a letter 'G' next to the 'D'?'. From this central circle, two yellow lines branch out: one to the left to a yellow circle labeled 'DG'.a.' and one to the right to a yellow circle labeled 'DS.a.'.

Is there a letter
'G' next to the
'D'?

YES

NO

DG'.a.

DS.a.
